Session I Tuesday, August 4

Look from the Whole.
Learn to use the QuantumThink Global Business Blueprint.
Identify Your Key Areas of Focus.

If you're looking at each area of your business independent of the others you could likely fall short of your goals. The QuantumThink Global Business Blueprint is a tool that enables you to see your business from the whole while at the same time seeing how all specific aspects of the business interconnect and interrelate.

Session II Thursday, August 6

You can't get "there" from "here."
Distinguishing your current (old) world view of your
business and establishing your new world view.
Creating a conscious Strategic Intent for the business.

Even looking from the whole is not enough to get your business where you want it to go. Results are always a function of the context you are operating from. If you are operating from an "old world view" of your business and its capabilities – you could be limiting your success – especially if you are operating from a structure that really needs to be updated. We first distinguish your "current" structure and its limits; then we take a leap and generate from the new to establish a new foundation. You will consciously create a Strategic Intent for the business – from the new perspective, "the new world view" of your business. When this happens you are setting the new trajectory for unprecedented results.

In QT Strictly Business we use the QuantumThink Global Business Blueprint (QT GBB) to assess where we are now, what specific areas need attending to, and most importantly we start from a quantum leap to a "new world view" of your business.

*Please refer to the QT GBB graphic for Areas of the model.
